

Recommendations and requirements for publishing with the Language Science Press series *Frame-Based Approaches to Semantics*

Last update 14 July 2023

Author guidelines

All authors must use the Language Science Press [templates](#) and must respect the [Generic Style Rules for Linguistics](#). Please follow these guidelines. The generic rules are complemented by house rules, described in the [LangSci Guidelines](#).

In addition to following the general guidelines, authors are encouraged to prepare their manuscripts according to the additional style rules and recommendations by the *Frame-Based Approaches to Semantics* series.

This includes the following:

- Frame names should be capitalised and written in Typewriter font, e.g. in Courier New (`Bounded_region`, `Event`, `Activity_finish`)
- Frame element names are written in SMALL CAPS (`CAUSE`, `EXPERIENCER`)
- Lexical units are written in *Italics* followed by POS specification (e.g., *complete.v*, *finish.v*, *wrap up.v*, *nice.a.*)
- Constructions are written in *Italics*, e.g. *way-construction*, *just because doesn't mean-construction*
- Frame-to-frame relations are written in regular font, but should be capitalised (*Inheritance*, *Causative_of*, *Perspective_on*)
- Use underline in examples to indicate the target of annotation in corpora.

Please follow the [LangSci Guidelines](#) and use [Leipzig Glossing Rules](#) for examples in the manuscript. Note that all examples are referenced in the text.

Submitting a proposal

When submitting a book proposal for the *Frame-Based Approaches to Semantics* series, authors should prepare a summary of the research topic, including a list of all chapters and their brief descriptions (e.g. up to 300 words for each chapter), an informative list of references and short bios of all authors.

We also invite proposals for edited volumes containing the planned title, overall content and aims of the book, as well as the related state of the art, structure of the volume (i.e., chapter titles, or titles of papers and authors' names if any) and details of how the editors plan to ensure a satisfactory level of reviewing. The latter should include information about the preferred reviewing process from those documented in the [LangSci guidelines: Reviewing of edited volumes](#). Specifications of the expected timeline as well as short

bibliographical notes about the editors, including their editorial experience (if any), are also welcome.

Templates and tools

Please visit the Language Science Press webpage for [templates](#) to prepare manuscripts and convert documents to LaTeX. Specifically, the following resources are available:

- **Overleaf templates** for Monographs, Edited volumes, and Papers in edited volumes
- **LaTeX skeletons** for monographs and edited volumes. In this case, download, unzip, and open `main.tex`. Skeletons for chapters in edited volumes.

Templates for **MS Word** and **LibreOffice/OpenOffice** are also available.
