

Proposal for a book to be included in the LangSci *Language Mediation in Context* (LMIC) series

In order to ensure a timely, thorough, and fair evaluation of your book proposal, please answer all of the items in each of Sections A-C as comprehensively as possible. You can use this document as a template by saving it under another filename and writing directly in it.

Information about the peer review process for submitted manuscripts and our AI policy can be found at the end of this document (Sections D and E, respectively). More information about the specific guidelines for the LMIC series can be found [here](#).

If you have any questions about the preparation of your proposal, please contact the LMIC series editors by email at lmic@langsci-press.org. You can send your completed proposal to the same address.

A. About the planned book

1. What type of book is planned?

- ☐ edited volume of contributions about language mediation in context
- ☐ research monograph on a topic on language mediation in context
- ☐ monograph based on a recent PhD or post-doctoral thesis on language mediation in context
- ☐ research-based textbook on language mediation in context
- ☐ translation of a seminal work in language mediation in context

2. What is the title of the book? Indicate whether this is definite or a working title.

3. Approximately how many of each of the following is foreseen in total?

Tables

Figures and/or images

Chapters

4. Is the use of any third-party material foreseen?

☐ No

☐ Yes

NB: written approval of the use of third-party material must be provided upon submission of the manuscript of your book/edited volume.

5. What is the estimated length of the book (in number of words, including notes and references)?

6. Are any special features such as accompanying audio, video, or datasets (unless those are hosted elsewhere) needed?

☐ No

☐ Yes

Please indicate the number, type, and size of any such files:

7. Which of the following referencing system will be used to prepare the bibliography?

☐ LaTeX+BibTeX

☐ Zotero

☐ RIS

8. What is the current status of the manuscript?

9. What is the timeline for the preparation of the manuscript (including the review process, for edited volumes) and the approximate submission date?

B. About the book author(s) or volume editor(s)

1. Information about the first book author/volume editor:

Full name:

Current affiliation:

Email address:

ORCID:

2. Information about the second book author/volume editor:

Full name:

Current affiliation:

Email address:

ORCID:

3. Information about any other book authors/volume editors:

Full name:

Current affiliation:

Email address:

ORCID:

4. Name of the book author/volume editor designated as the contact person for correspondence with the LMIC series editors:

C. About the contents of the book

1. What do you see as the main motivation for publishing this book?

2. How will the book contribute to our understanding of language mediation in context?
3. What are the unique aspects of this book with regard to content, context, contributors, methodology and/or accessibility.
4. Please indicate the intended readership of your book (multiple options possible):
 - ☐ Researchers and scholars
 - ☐ Post-graduate students
 - ☐ Undergraduate students
 - ☐ Language mediation educators or trainers
 - ☐ Language practitioners
 - ☐ Language policy specialists
5. Provide the foreseen table of contents of the book, including the title and a 100–200 word summary or abstract for each chapter. For edited volumes, also provide the author(s) of each chapter and their affiliations.

Table of Contents

1. Chapter title
Author(s) and affiliation(s)
Summary or abstract
2. Chapter title
Author(s) and affiliation(s)
Summary or abstract
3. Chapter title
Author(s) and affiliation(s)
Summary or abstract
4. Etc.

D. About the peer review process

For monographs and textbooks, the LMIC series editors will arrange for the submitted manuscript to be peer reviewed. If the reviews are positive, the book authors are expected to take the reviewers' feedback on board or explain why any aspect of it has been rejected in their revised manuscript. The LMIC series editors will arrange that the final manuscript be checked for coherence, consistency, completion, etc. before it can be accepted for publication.

For edited volumes, the volume editors are responsible for having each chapter reviewed by at least two peer reviewers to ensure scientific merit and coherence. One of these can be another contributor to the volume, if there is no conflict of interest (i.e., not being related, never having been the student or teacher of the author, not having worked at the same institution or published together in the past five years). The other reviewer must be a non-contributor to the volume. In the case of conflicting or inconclusive reviews,

the editors can involve another peer reviewer or do an editorial review of the respective chapter(s). Reviewers should be encouraged to report any suspicion of undeclared or inappropriate use of AI (see Section E for details about AI policy). Likewise, reviewers need to be informed that they cannot use AI to summarise the texts they are reviewing. They cannot use it to evaluate texts or to draft their reviews, either.

The volume editors are also expected to do an editorial review of each revised contribution to ensure that:

- the relevant feedback of reviewers has been taken on board
- there are no unnecessary redundancies between the chapters
- the chapter bibliographies are complete and correct
- the writing and style are appropriate for an academic publication

The volume editors must submit documentation of the peer review process upon submission of the complete manuscript. The LMIC series editors will arrange for the manuscript as a whole to be checked for coherence, consistency, completion, etc. before it can be accepted for publication. If deemed necessary, the LMIC series editors can also have specific chapters checked for scientific merit.

E. About the AI policy for books published by LangSci

Please note that the mission of Language Science Press is built on core academic values such as integrity and originality of thought. Authors and editors can use AI only for assistance, but not for content creation. Permitted forms of assistance comprise finding formulations and reformulations, language checks, translation aid, code and format creation (e.g., transformation of written bibliographies to BibTeX) and the like. Whenever AI is used for assistance, authors and editors are obliged to perform thorough checks and/or revisions afterwards to ensure the accuracy and appropriateness of the AI output.

Any use of AI tools must be disclosed in the acknowledgment section. Authors and editors must include a brief description of how AI was used and cite the AI tool(s) and version(s) used.

Excessive, inappropriate and/or undisclosed use of AI can lead to rejection of a manuscript and to a ban from publishing in the LMIC series.
